

Step 4: Connect the pieces you made in steps 1-3 as shown in the picture.

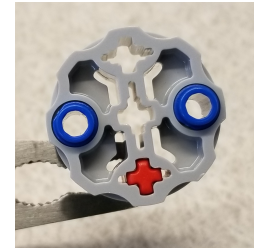

Step 5, Finish the body:

- Insert the black rod into the gray neck joint.
- Slide the neck joint onto the far blue connector.
- Connect the short dark gray beam to the 2 blue connectors as shown in the picture.

Step 6, Make the face:

- Insert the 2 blue eyes into the face plate.
- Insert the red tongue from the back side so it is flush with the face plate.
- Connect the short dark gray beam to the 2 blue connectors as shown in the picture.

Step 7: Slide the head chassis onto the black neck rod with a round gray supports on either side. Slide the face onto the end so the black bar doesn't stick out. (See picture below)
